Local Company Secure Drilling Rig

IRMA OIL DEVELOPMENT CO. HAVE MOVED RIG
TO LEASE AT IRMA

This week the local Oil Co. have made their first move to start development on their extensive holdings in the Irma, Fabyan and Wainwright fields. Men and teams have been busy the last few days moving a rotary drilling outfit on one of their leases on Legal Subdivision 16 of Section 28, Township 45, Range 9, within two blocks of the business section of Irma.

The Irma Oil Development Co. was incorporated last fall and in spite of the hard times they have met with fair success in raising the necessary capital to begin operations. They are the only independent company operating in the above fields who have bought their own outfit. The company is out of debt and intend to pursue the policy of "pay as they go". The directors are all local men and if they conduct the business of the Irma Oil Development Co. as well as they have conducted their own business during the years they have lived in the Irma district they will without doubt meet with success. The company is only capitalized at \$150,000.00 and is incorporated under the laws of Alberta. Only forty thousand dollars worth of stock is being offered to the public, part of which has been subscribed and with the present activity in the fields in which they are interested, the balance will no doubt soon be taken up.

The companies leases are chequerboarded over the Irma Fabyan and Wainwright fields and consist of some of the most promising leases in these important districts. Considering the small capitalization and the conservative management we believe the shareholders of this company will have a good chance for their money.

CANADA'S PROSPERITY

When the war was on and this country was putting forth every effort, at home and overseas, for the allied cause, a great spirit of confidence and faith, of willingness to work, economize and sacrifice filled every class of the community from the highest to the lowest.

As a result, Canada's honourable war record has set her high among the nations, with a place at the Imperial Council table and a voice in international affairs.

Canada must and will come, with equal honour, through the troublous times of post-war adjustment. The only question is, will all of us help or some of us hinder, by pessimism, apathy, or class jealousy?

To the Canadian farmer this question comes with a peculiar force. Agriculture must be the economic balance wheel of this or any nation. It is an occupation where nature herself demands energy, courage, economy, and efficiency. These sturdy qualities radiate from our farms to industries in other walks of life, where so many leaders were country born and bred.

The farm home and farm life is the source of what has been and is the strongest and truest in our national character is interwoven with the history of Canada from its infancy. The settlers on the shores of New Brunswick and Nova Scotia, toiling to clear a path of forest and sowing their grain among the stumps; Hebert and the pioneers of New France, fighting Indians, enduring privations, wrestling merely a rude living from their small clearings, but full of faith in the future, if not for them, then for generations yet to come; the men who rescued Upper Canada from the wilderness; the Red River colonists, who, after two years of complete destruction of their crops, sent a party to the Mississippi for seed grain for the next year and won; These men made possible the Canada of today.

The farmers of Canada, then, have a rich history and a noble tradition to live up to. Upon them Canada's progress has always, in the main, depended; upon them it will always, in the main, depend.

What, then, is necessary for the farmers of today? Simply the application of those qualities we have referred to—energy, courage, economy and efficiency, and under present day conditions the return is sure and speedy. A very high percentage of farms owned by farmers in this country have been acquired and paid for in the farmer's own lifetime. For the

present and future generations there is exactly the same opportunity. True with each generation, and perhaps of later years, we may have to change our type of crops to meet changing market requirements, but surely that is a trifling task compared with that of those who had to establish themselves in a new country, create their farm, their community, their markets, and their civilization.

During the war years, the farmer, like most others, became unreasonably optimistic. As in other industries, he over-capitalized, tied up too much money in extravagant buildings and expensive machinery, bought tractors to get the crops in more quickly and easily, without considering whether the actual earning power of these warranted the investment. With the depression, which has followed, this over-expansion has been a serious burden and has shaken the faith of some in ultimate success.

We must get back to the indomitable courage and unstinting effort of Canada's early days. The farmer must remember that in the last analysis he is infinitely better off than the wage-earner of the city. True, his cash income may sometimes be small, but he can, at the very worst, gain his living from the soil, while in the city the larger wage soon melts away in paying for things which on the farm involves no cash outlay. The farm products are necessities of life and must always command a market. The products of city industries must often create their market and their sale is subject to wide fluctuations. Sure of a market, then, the farmers' main problem is simply the lowering of cost of production to permit of a fair margin of profit even at present prices. This can be done and is being done.

We may call attention to the advertisement placed in this issue by the Federal Department of Agriculture. It is more than an advertisement, it is a call to united and cheerful effort, a summons to the Canadian spirit of the "will to win" which has burned so brightly throughout Canada's history—a spirit which is so well shown in a message received in Ottawa only a few days ago from one of the foremost farmers of the Province of Alberta. He says: "It started to rain the last part of the week, and this coming after the recent heavy rains has put the soil in a condition that it has not been in at this time of the year since 1910; the farmers are consequently very jubilant and if optimism could pay debts the farmers of Southern Alberta could by next fall cancel our National Debt."

Imperial Oil Company Spud In New Well

Largest and Best Equipped Oil Drilling Outfit in Canada Starts on Quest for Alberta's Hidden Resources.

After six weeks steady working the crew at the Imperial Oil Co's well on Legal Subdivision 5, of Section 14-45-8 started the insurance rotary drill on its way to the liquid gold that is supposed to lay some three thousand feet below the surface, on Tuesday of this week.

The crew is from ten to fourteen men with the assistance of several of the local farmers who have furnished teams to assist in moving the heavy machinery and equipment have made good time in moving and placing the machinery and equipment from the site of the Fabyan well some three miles east of the present location.

This is by far the largest and best equipped oil drilling outfit ever operated in Canada. It consists of practically two complete drilling outfits, a mammoth rotary drilling outfit which the company shipped to Fabyan over a year ago from Wyoming and which was used for drilling the sensational Fabyan well which went so far to confirm belief that a large body of oil would be found in Central Alberta by scattering deposits of heavy oil over the country side at various times, when the tremendous gas pressure forced the mud, water and oil out of the hole.

At the Fabyan well the standard equipment was not installed till after the heavy gas sands had been struck and considerable time was lost in waiting for the new equipment and having it installed. At the new location the derrick has been arranged so that the drillers can readily change from one system of drilling to the other without delay.

Three large boilers have been installed at a safe distance from the

drilling rig these are connected with the pipe line which brings the gas from the Fabyan well and can supply all the steam needed for the large pumps used with the rotary outfit and for the engine that drives the powerful machinery.

A separate engine has been installed to operate the standard string of tools which are operated from another side of the derrick. When drilling a wild-cat well in a new field where the formations have not been located there is always danger of the heavy mud pressure used in the rotary system forcing the oil back in the sand allowing the drill to pass through it without the driller recognizing it. It is presumed that when the elevations are reached in which oil was encountered in the Fabyan well that the drillers will change over to the standard tools so as to be in a better position to test out the formation. The standard tools are not as well adapted for drilling through soft formations encountered in the first two thousand feet.

With the knowledge gained of the formations at the Fabyan well the drillers should be able to make a record in drilling this well.

Having a few days at the Fabyan well the rotary reached the gas sand in one month's time, it is believed by some of those in close touch with the conditions of the formation that the gas sand should be drilled to, in from fifteen to twenty days. After this it should not take long to drill through the intervening formations to the sands that contain the oil from which the gas in the upper sand has been formed.

DOMINION TOPOGRAPHICAL SURVEY PARTY WORK- ING NEAR IRMA

A party of Topographical surveyors consisting of seven men under Mr. G. A. Bennett have established a camp about seven miles north of Irma. This party is taking levels of the country from Battle River to Ranfurly near Birch Lake from which maps will be prepared which will be available for those interested in knowing the elevations at the various points. It is expected that this party will be followed by one of the parties of Geological Department who are expected in Alberta this summer.

BRITISH PETROLEUMS MOVING EQUIPMENT

The drillers at the British Petroleum well north of Wainwright are busy moving the equipment to the new location about five hundred feet from well No. 1 which is on Section 36-45-7-4. Mr. T. Schieck has the contract for a new water well to supply water for the new location. The derrick has been completed and things should soon be in shape to commence operations.

THE POWER OF SUGGESTION

A new device for saving passengers trouble has been adopted by the Dining Car Service of the Canadian National Railways. Throughout the coaches on all trains to which Dining and Cafe Cars are attached, little dodgers are now distributed before each meal, with several suggestions for suitable combinations of dishes. These dodgers are printed in both English and French. This gives the patron of the Dining Car a little time to decide upon what he will order later, and eliminate the tiresome necessity of studying a large menu-card. If the traveller is accustomed to set a limit of price upon his meals, there is no need whatever to exceed it. The prices for a complete menu for Breakfast, Dinner and Supper are most moderate, ranging from 35c to \$1.25. Having this choice according to pocket-book and appetite, upon entering the Dining Car, the traveller will find himself served as quietly and satisfactorily as he would be in any well-appointed home.

WHAT THE HEAVY RAINFALL MEANS

In this favored year, when Alberta is receiving great rainfalls at the season when the rain is so beneficial to growing crops, a few figures as to what the rainfall means in gallons and pounds may be interesting. In a number of sections rainfalls exceeding one inch in depth each, have been frequent.

One inch of rainfall on one square mile is equal to 2,622,000 cubic feet of water.

One cubic foot of water is equal to 6.23 imperial gallons.

One cubic foot of water weighs 62.5 pounds.

These figures are taken from the Dominion figures used in the Hydro-metric Surveys in the Province of Alberta.

An inch rainfall on one square mile would be 14,773,536 gallons, or 145,200,000 pounds, or 72,600 tons. With these figures in mind it will be easy to understand why sloughs and lakes fill up, and why the rivers and streams are booming and in flood to accommodate the surplus water which the soil will not take up and which becomes "run-off" or waste.

One inch of rainfall on one acre equals 3,625 cubic feet, or 22,583 gallons, or 226,562 pounds, or slightly over 113 1/4 tons.

The minimum winter flow of water in the North Saskatchewan River at Edmonton is 1,600 cubic feet per second. The maximum flow on June 25th, 1915, at the time of the big flood, was 207,447 cubic feet per second. On that day the water in the river was 44.5 feet above low water level. On Friday of this week the city water gauge showed the river to be 15 feet above low water level.

LOCAL CROP REPORT

The crop prospects are looking so good that they need no comment, and the spirit of optimism pervades all over the country. The rains have been plentiful and followed as they have been by cool spells have allowed the crops to get the maximum amount of good from them. Feed is also plentiful. The gardens have also profited by the moisture, and those that were backward are now making good headway, growth being rapid.

WAITING FOR MACHINES TO START WORK

Preparations for laying the gas mains to Edmonton and Viking are going steadily ahead. The turning of the first sod at Viking on July 2nd did not materialize on account of the non-arrival of the ditching machines. Mr. John Faithful, of Cleveland, Ohio, sent up here by the BuckEye Ditching Machine Co. arrived last Thursday evening. He went to Wainwright on Saturday to clear the ditching machines which are being held up there for customs duty. This is expected to be completed this week and the machines unloaded at the local station any day.

Mr. Henroth, a master driller from Kansas, arrived on Monday and will take charge of the finishing work of drilling No. 10. Everything is in readiness at this well for starting the drill on down to strike the gas. This well is opposite the Jas. Newby farm. The shacks have been put in first class shape, awaiting the crew that is now arriving at the well site day by day.

A boiler has been moved down from the Talpy well at Birch Lake, arrangements for which Mr. Griffith, local field superintendent completed on Monday.

Mr. Griffith also reports the arrival of a carload of six inch pipe for the field and 9,200 lbs. of two and three inch pipe for the Viking mains.

Mr. E. G. Hill, general manager of the gas company, the Northwestern Utilities, was down from Edmonton last Thursday, buying right of way for the gas mains. He stated to the news reporter that a big celebration is going to be staged when the first gas is turned on in Viking. It ought to be some celebration. We have waited eight years for it.

Mr. Matheson, solicitor for the gas company, accompanied Mr. Hill on Thursday and went over the field with him. Mr. Matheson was the man who a year ago made a proposition to the citizens of Viking to supply gas. This offer came from the former company, which has now been taken over by the Northwestern Utilities. Mr. Matheson feels that in some measure he is responsible in getting gas for Viking and is leaving nothing undone to see that his promise made last year is fulfilled. The Vikings gas franchise is now before the utilities commission awaiting their sanction.

Work of coupling up all the gas wells and cleaning them out is being proceeded with. Mr. Fred Enler, has been made foreman of a crew of men who are going to take up this work at once. About fifty men will be employed for this purpose in the main field.

Within the next few days the field in general should take on an atmosphere of intense activity. Cars of pipe are rolling this way. Contractors are busy getting their crews ready to haul pipe and supplies to the field and when the work starts things are going to hum all along the line.

DEMPESEY RETAINS HIS TITLE

Jack Dempsey, heavyweight boxing champion of the world, retained his title, after fifteen rounds of a fast and furious boxing with Tommy Gibbons, the challenger. The fact that Gibbons was not knocked out in the early part of the fight, upset all the dope of the "know it alls". Dempsey retained his title on a decision of the referee, he having the better of 12 rounds of the fight. The big match was held in Shelby, Montana, a town that has sprung up in Northern Montana during the past year due to oil being struck nearby. Some of the townspeople becoming ambitious and flush with easy money from oil speculation and lucky guesses proceeded to put the town on the map by promoting a world's championship fight. As a financial venture the fight was a frost, many of the small town sports losing fortunes. As a fight it was better than expected. The town has received a lot of publicity all right, but not perhaps all to the good.

HEARD IN 'A CITY SCHOOL'

Teacher: What animal is it that lives on the western plains, burrows in the winter time, and is hunted the rest of the year for his pelt?
Bright Pupil: The farmer.

The Irma Ladies Aid will meet at the home of Mrs. Seton, hursday afternoon July 12th. All ladies are welcome.

CHAUTAUQUA AT IRMA, JULY 24-5-6-7

Mr. E. T. Lea of the Dominion Chautauqua was in Irma Wednesday and met with the guarantors of this year's Chautauqua when the different committees were appointed as follows: Chairman Jas. Hedley, Sec. Treas. H. W. Love, Advertising Committee, H. Kasten; W. Bibby, H. W. Love, Tent Committee, W. Bibby and others. Piano Committee, H. Kasten, R. C. Loss and T. W. Shaw. The tickets for this year's four days performance are in the hands of the Secretary and can be had from any of the Guarantors by calling at the Times Office.

NEW ATTRACTIONS EDMONTON EXHIBITION

Very Large Attendance From Country Districts is Anticipated

With new attractions and the best midway obtainable, and every inch of space allotted to merchants' and manufacturers' exhibits, the Edmonton Exhibition, which opens on July 16th, promises much entertainment to visitors.

There will be three new Federal Government exhibits—relief maps of Edmonton district, of great interest to settlers as they show drainage possibilities, etc.—a new Government fruit exhibit, and the National Dairy Exhibit. This year, for the first time in some years, the automobile dealers are making a big display of the new models. One of the merchants' exhibits which will be of interest to women is a dressmaking demonstration for home sewers. A baby clinic will be held by the Provincial Health Department to which parents are invited to bring all children of pre-school age. Hundreds of mothers take advantage of the weekly clinics held in larger centres, but the country parents have not the same opportunity to take advantage of these free clinics.

The attractions are the best that can be secured, and in addition to the grand stand note, will include running horse races, auto races, chariot races, Roman standing races, relay races, and fireworks, as well as many special local features.

With a free camp ground for motor parties, for which the Exhibition management provides tents or cots if desired, and with excursion rates of fare and one-third, many visitors from outside points are expected.

ORINDALE SPORTS AND PICNIC

The Orindale Baseball Club are holding a Sports and Picnic day on the afternoon of Wednesday, July 11th at the Orindale Baseball diamond half a mile west of the Orindale Post Office. Horse racing, three ball games and a full bill of athletic sports will be put on. Liberty prizes will be given. Ladies will please bring baskets and the men will furnish coffee, tea and hot water. In the evening a dance will be held in the barn of Mr. W. F. Prosser, adjoining the grounds, instead of at the School as formerly advertised. Everybody come.

NEW POOL ROOM

Mr. Jas. Hedley has moved his pool room and barber shop to the West side of Main Street next to the G.W. V.A. building. The new location is well situated in the middle of the main business block in town. The building has been enlarged adding greatly to the appearance.

NOTICE

On account of the increase on our subscription list we cannot continue sending The Times to subscribers in arrears. If you don't keep in touch with all the developments in Alberta Leading Oil Fields, see that your subscription is paid in advance.

CHURCH NOTICE

The unveiling of the memorial pulpit in the Irma church which had been announced for next Sunday night has been postponed till Sunday night July 22nd.

SUNDAY SCHOOL PICNIC

A combined Sunday School Picnic will be held at the farm of Mr. Geo. Higinson's north east of Irma on Wednesday afternoon, July 18th. Everybody is cordially invited.

Mr. Peter Burr, of Spokane, brother of the late John Burr has been in Irma during the last week looking after his brother's farm in the Roseberry district.

RED ROSE

COFFEE

For particular people—
Has a sparkling clearness and a smooth richness, for all the chaff and dust is removed by our special process.

Peace Dawns In Ireland

After many long and bitter years of struggle, marked by horrors and atrocities of all kinds, it would at last appear as if a real peace was dawning in Ireland. With the passage of the Irish Free State constitution by the British Parliament it was felt that peace would almost immediately follow, inasmuch as by that constitution Ireland was granted a large measure of home rule than was dreamed of by the House of Commons, and given as liberal and democratic a form of government as is enjoyed by any country today. Unfortunately, there were a few irreconcilables who would accept nothing less than absolute independence and complete severance of all ties with the British Empire, and so the warfare continued, confined, however, to the Irish people themselves, but terribly destructive of life and property.

However, on the anniversary of Queen Victoria's birth, Eamon de Valera, the Irish republican leader, addressed a letter to all ranks in the republican army calling for discontinuance of the armed struggle, ordering the laying aside of all arms, and declaring that the "republic" can no longer be defended by arms. Further sacrifices on the part of the republican irregulars would, Valera declared, be in vain, and the continuance of the struggle he unwise in the national interest. At the same time the republican chief of staff, Frank Aiken, issued an order that all arms were to be dumped.

All friends of Ireland must rejoice at this decision. The cause of home rule for Ireland has been won, handsomely so, but the plan of setting up a republic in Ireland could never be anything but an idle dream, and the longer it was persisted in the greater the suffering and loss involved on the Irish people; and the longer the period that must elapse before the Emerald Isle would launch on an assured future of happiness and prosperity.

For this happy culmination of the tragic events of the past few years, the Free State Government and its staunch friends and supporters are deserving of all praise and full credit. From the date of the creation of the Free State, the Government of Ireland have loyally fulfilled their treaty obligations with the British Government, have staunchly upheld the Free State constitution, and have energetically set to work to bring order out of chaos and establish all the institutions essential to the maintenance of law, order and good government. In the face of seemingly unsurmountable difficulties they have succeeded in what is after all an amazingly short space of time.

Irishmen have done some wonderful things for the British Empire throughout the centuries of the past. Britain owes much to them. Even in the recent Great War when Britain's enemies sought to induce Irishmen to take advantage of the Empire's life and death struggle to declare their absolute independence and join forces with Britain's enemies, the rank and file of the Irish people refused and remained steadfastly loyal, and tens of thousands of them laid down their lives that the Empire might be saved to do its great work in the world. And what would the world be today if it was not for the strong hand and steady influence of the British Empire?

The ending of the unhappy struggle in Ireland will likewise serve to remove the greatest of all obstacles to the development of a still greater understanding and cordiality between the Empire and the United States. Home rule for Ireland has for years been almost a bone of contention between the United States and Great Britain and Ireland. It has been used to create misunderstanding and cultivate hatred of Britain throughout the United States, and has led to many ill-advised statements against Great Britain, even by prominent men, in the heat and excitement of election campaigns in the big republic. United States money has very largely financed the armies of discontent and revolt in Ireland, but, with the granting of the Free State constitution, the vast majority of the American people were agreed that Ireland's aspirations had been met, and with few exceptions support for Valera and his irreconcilables was discontinued.

If Valera and his followers, having now recognized the inevitable insofar as armed resistance to the Free State Government is concerned, will throw their energy and influence to developing Ireland along the lines and arts of peace, Ireland may with confidence look forward to a bright future, moving steadily forward to her proper and rightful place as one of the outstanding nations in that great sisterhood of nations which go to make up the British Empire.

Natural Resources Bulletin

Production of Natural Gas Increasing In Alberta

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

In 1922 Canada produced 14,954,097 thousand cubic feet of natural gas. Of this quantity Ontario produced 7,800,000 thousand feet. Alberta was second with an output of 6,400,000 feet. Ontario, however, provided 62,274 thousand feet less than in 1921, while Alberta increased her 1921 production by 1,454,116 thousand cubic feet. With the intensive prospecting and drilling, and the number of new gas producing wells that are being brought in the present year should show a still further increase in production in Alberta.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from a dose of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a "household" remedy because of its usefulness in preventing many small ills that cost more in time. Sold everywhere in 2-cent bottles.

Paris Bread Highest Since 1870

The price of bread in Paris was raised on May 26th, the cost per kilo being one franc, twenty centimes. This is the highest price that bread has reached since the siege of Paris.

PAIN IN THE JOINTS

Is An Indication That the Blood Is Thin and Watery

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertrude Deane, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says: "About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs so that I could not stand alone, and had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery, blood or rheumatism, get a box of Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lonesome Place

Cholly—Yes, I had a cold in my head, but it's gone now.

She—How you must miss it.—Boston Transcript.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

How to Address Her

When Lucy A. Goldsmith, export manager of the Acolian Company, and one of the best known women in foreign trade, attends conventions and banquets she is very often the only woman present. The chairman at these functions have found difficulty in using the correct phrase to open the meeting. "Gentlemen" would be untrue; "Lady and Gentlemen" hardly seemed to fill the bill. Finally one chairman, more ingenious than the others, evolved, "Miss Goldsmith and Gentlemen," and this form of address is now de rigueur in foreign trade circles.—New York Globe.

Success Of Clubs

The Boys' and Girls' Club movement in Manitoba began concurrently with the agricultural instruction grant being made available in 1914. Its development has been noteworthy, as there are now 225 central clubs, 1,600 branches and over 30,000 members. Last year 215 club days were held at which over 30,000 children exhibited.

"Vernon," said the teacher of the juvenile class, "define 'ostentation'." "It's the way our neighbors show off," answered Vernon.

Many a man's so-called moral courage is laziness.

W. N. U. 1475

Wretchedness OF Constipation

Can Be Quickly Overcome by CARTER'S LITTLE LIVER PILLS. Purely vegetable—act sure and gently on the liver. Relieve biliousness, headache, dizziness and indigestion. They do their duty. Small Pill—Small Dose—Small Price.

Canada's Fisheries

Of Great Extent

Two of the Four Great Sea Fishing Areas Border on Canada

It is not generally appreciated, even by Canadians, that two of the four great sea fishing areas of the world border on Canada, says the Natural Resources Intelligence Service of the Department of the Interior. In addition, the lakes and rivers of the Dominion constitute approximately half the fresh water of the globe while the great inland sea of Hudson Bay, still practically untouched, may be regarded as a reserve. Their actual extent alone suffices to render these various fishing areas remarkable.

The Atlantic coast line, from Labrador to the boundary between the United States and Canada, measures over 5,000 miles—not including the lesser bays and indentations. It embraces the Bay of Fundy, 8,000 square miles in area, the Gulf of St. Lawrence, 40,000 square miles, and other waters which make the total area not less than 200,000 square miles. Moreover, 15,000 square miles of inland waters are entirely controlled by the Dominion, while Hudson Bay, with a shore line 6,000 miles in length, is greater than the Mediterranean. Crossing the continent, the Pacific shore line is over 7,000 miles long and has the unique advantage, thanks to its multitude of islands, of being exceptionally well sheltered for fishermen. Finally, the fresh water lakes of the interior constitute an area of 220,000 square miles, Canada's share of the Great Lakes alone covering 34,000 square miles.

The Canadian fishing waters are exceptional in fertility, as well as in area, is denoted by the fact that the entire catch of salmon, lobsters, herring, mackerel and sardines, nearly all of the halibut and many of the cod, lake and pollock are taken within 10 miles from shore. Further, the value of the Dominion's fisheries resources is enhanced by the circumstances that the colder waters of the northern latitude produce fish of the finest quality, while climatic conditions also facilitate the work of distributing and marketing the catch in good condition.

Oldest Bell In Use

The oldest known bell still in use is in the parish church of St. Mary of Loreto at Villavieja in the Abruzzi Mountains, Italy. Following the inscription "Ave Maria" is "Anno Domini 600." Bells were invented according to church authorities, by Pope Rabianus, who died in 606.

A Blessing

Mrs. Scragginton—My contempt for you is too deep for words. Scragginton—I am thankful for that.—Life.

MRS. ANDERSON TELLS WOMEN

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Leslie, Sask.—"For about a year I was troubled with a distressing down-bearing pain before and during the periods, and from terrible headaches and backache. I hated to go to a doctor, and as I knew several women who had taken Lydia E. Pinkham's Vegetable Compound with good results, I finally bought some and took four bottles of it. I certainly do recommend it to every woman with troubles like mine. I feel fine now and hope to be able to keep my medicine on hand at all times, as no woman ought to be without it in the house."—Mrs. OSCAR A. ANDERSON, Box 15, Leslie, Sask.

Mrs. Kealey Adds Her Testimony. Copenhagen, N. Y.—"I read your advertisement in the papers and my husband induced me to take Lydia E. Pinkham's Vegetable Compound to get relief from pains and weakness. I was so weak that I could not walk at times. Now I can do my housework and help my husband out doors, too. I am willing for you to publish this letter if you think it is of any use to women. I am, HENRIETTA KEALEY, R.F.D., Copenhagen, N. Y. Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound before they give up hope of recovery."

Costumes Now On Display

Shown above is a seasonable costume. It is composed of a white silk jacket with a black design and a skirt of loosely woven silk cloth in white. The hat is of white felt embroidered in black wool.

Human Faces Are Changing

Sir Arthur Keith Says "Adenoid" Type Is Developing

According to Sir Arthur Keith, a prominent anthropologist, changes are taking place in the human form more rapidly than at any other period, but there are no signs of a coming race of supermen. He says one of the most notable changes is facial. He asserts a long, narrow type of face is being evolved, which he describes as the "adenoid" type, unknown in prehistoric times.

Sir Arthur finds, however, that brains are not increasing, but this is nothing calamitous because, he says: "I should say most of us have more brains than we know what to do with. I don't think one person in fifty of the present population uses his brains to half their capacity."

But, while man is not working his brains overtime, Sir Arthur says he is not giving his "innards" a square deal. "We give our digestive tract no rest," he complains. "When we are not whipping them up with patent sauces, we are seeking to soothe their rebellions by treating them with patent pills."

Although Sir Arthur predicts the evolution of the hatchet faced man, he sees no alteration in his average stature. During the war it was learned that this was five feet six inches—the same as it was in the neolithic age. Professional men average five feet eight.

Interesting Vital Statistics

Saskatchewan Has Lowest Death Rate In British Empire

Great Britain's birth rate in 1921, namely, 22.4 per 1,000 population, was the lowest ever recorded in that country, except in the war years, according to a report just issued by the British Registrar-General. The number of marriages in 1921 was 60,000 less than in the previous year. However, 1920 was a record year.

The divorce decrees granted by the courts of Great Britain in 1921 totalled 2,500, the highest number yet recorded.

The Registrar-General in his report adds some particulars of the vital statistics for some of the districts of the various British dominions. From these it appears that Manitoba has the highest birth rate, 30.3, and British Columbia the lowest, 23.3. New Brunswick has the highest death rate, 12.5, and Saskatchewan the lowest, 7.4. New Brunswick has the highest infant mortality rate, 113 per 1,000, and New Zealand the lowest, 48 per 1,000.

The highest marriage rate is in Natal, South Africa, 18 per 1,000, and the lowest is in Saskatchewan with 13.4.

U.S. Indians Wealthy

American Indians own property worth \$1,000,000,000, the U.S. Interior Department, reporting on the vast wealth of the remaining redmen, says it includes forest lands, mineral and oil rights, livestock and \$25,000,000 in cash in the United States treasury.

Sometimes it's what a man doesn't say that puts others in a hole.

Detroit's Dependence

Workmen Of Detroit Are Mostly In Automobile Industry

Half the industrial employees in Detroit in 1914 were employed in the automobile or allied industries. Today approximately two-thirds of Detroit's industrial employees work in either automobile or closely allied industries. In 1914 about 76,000 people worked in automobile or accessory plants. Today the city has approximately 320,000 industrial workers, and of these about 205,000 are employed in motor car plants or in establishments where parts or accessories are manufactured.

A Father's Sensible Wish

The will of a Toronto man who died recently contained a clause that shows common sense and a keen desire for the welfare of his son. The clause referred to says: "I wish that my son Keith shall learn thoroughly a good and honorable business or profession as his aptitude for such may direct, also the value of money, and, above all, the value of beauty of a strong manly, Christian life." No man could wish more for his son.—London Advertiser.

Some men think they are doing a great deal toward righting the world's wrongs by fussing with their neighbors.

PILES
Do not suffer another day with itching, bleeding, or protruding piles. No operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 50c. a box; all dealers, or Edman, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp to pay postage.

MONEY ORDERS

Pay your out of town orders by Dominion Express Money Orders. Five dollars cost three cents.

All About Horses
A TREATISE ON THE HORSE
Get this book! You cannot afford to be without it. It costs you nothing. If you own horses, it can save you hundreds of dollars. The book—"A Treatise on the Horse"—is found for the asking at your drugstore. The horse and all about him—his diseases and their treatment—his management and his breeding—everything you need to know about horses is in this book. Ask your drugstore for a copy of "A Treatise on the Horse" or write to a bookseller.

Canada's Newsprint Industry Has Made Important Strides In The Past Few Years

In March last a new record was established by the newsprint industry of Canada, not only in manufacture but in exports. For the first time the monthly record exceeded in each case the 100,000-ton mark. The output of the Canadian mills in March was 106,361 tons, while the exports were 113,450 tons, a portion of the latter being shipped from stock. In May last a previous record was made, when production reached the 90,000-ton mark; the increased output in the past eleven months, therefore, represents a substantial advance.

New paper-making machines are being installed in many mills, and in these also Canada is establishing records. Until about two years ago no paper-making machine had been built in Canada. The growth of the pulp and paper industry in this country was, however, assuming such proportions as to warrant the Dominion Engineering Company of Montreal, entering upon the construction of these mammoth machines. Their first unit, made for the Laurentide Pulp and Paper Company, produces a sheet of paper 166 inches in width. What is remarkable about the machine, however, apart from it being the first constructed in Canada, is the fact that it is also the fastest running newsprint machine yet built, producing up to 1,635 feet per minute of 166-inch paper.

Machines of record width have been installed by the Abitibi Pulp and Paper Company and a number of other companies are installing these mammoths. These have a paper width of 234 inches, and run at the rate of 800 feet per minute, producing from 80 to 100 tons of newsprint per day. This width visualized makes it understood when it represents a strip of paper nineteen feet six inches wide, on which three automobiles could drive abreast. The output of this latter machine in one minute of running time would produce 3,757 sheets of paper equal in size to a four-page, eight-column newspaper.

Coinciding with the development of the newsprint industry and the introduction of these enormous machines is the greatly augmented demand upon the pulpwood supply of Canada. If our resources of pulpwood could be assured of depletion only by industry, with the greater attention being given to scientific forestry methods and replanting by the pulp and paper companies, the prospects are good for a continuous supply of this raw material, says the Natural Resources Intelligence Service of the Department of the Interior. Unfortunately this is not the case. Forest fires are taking a tremendous toll, not only of the tree which is of pulpwood size today, but of that which would produce the pulpwood supply of ten, twenty or more years hence—the young growth and seedlings are destroyed, and the ground left barren.

Many other industries benefit through the development of the pulp and paper industry. The engineering trades supply large quantities of machinery for the pulp and paper mills and for the water-power development so closely associated with the industry. Large supplies of materials other than the raw pulpwood are required, the manufacturers of wire screening and felt benefitting to a considerable extent.

Probably the railways are more directly concerned than any other interest in the growth of the pulp and paper industry. The freight created by the necessary transportation of supplies, such as coal, etc., and the delivery to consumers of the finished product or to the mills of the United States of pulpwood and woodpulp constitutes one of the large sources of revenue. During the year ending March 31 last the exports of pulpwood were 1,096,462 cords, while mechanical and chemical pulp amounted to 550,000 tons and newsprint of 1,000,522 tons.

The value of the pulp and paper industry to Canada, in export trade alone, for the same period, represented \$122,554,889, \$72,667,826 of this being accounted for by newsprint, \$33,484,056 by other papers. What it represents in employment is shown by the 1921 report of the Dominion Bureau of Statistics of the industry, which gives the number of employees as 23,524, with wages and salaries as \$31,159,090.

When it is realized that this is but one of the many industries dependent upon the forests for existence, Canada has good cause to be alarmed over the tremendous broads which forest fires are making upon this natural resource.

World's most famous rug is the Arbad rug in the South Kensington Museum, England, and valued at \$250,000.

W. N. U. 1475

The Wireworm

A Serious Pest of the Farm and Garden

The wireworm is a slender yellowish-brown worm about an inch in length when full grown. The insects live entirely below ground, where they feed, thrive and multiply on decaying vegetable matter and on the roots of growing plants, their smooth, wiry, cylindrical bodies allowing them to move freely through the soil. Potatoes, onions, beets and other garden vegetables are commonly attacked, and the losses caused are sometimes very great. Decaying vegetation, produced by the ploughing down of sod land in the spring or autumn, provides ample food for the young wireworms for a year or more. When fully grown, the wireworm transform into a pupa. This is the resting stage of the insect, and takes place in a small earthen cell a few inches below the surface of the ground. Later, and usually in the autumn of the year, the pupa transforms into an adult beetle, which emerges during the following spring. These beetles are about half an inch in length, and brown or black in color. They are usually spoken of as "click" beetles or "snapping" beetles, from their peculiar habit of flipping themselves into the air, with an audible click when placed on their backs. They live above ground and feed voraciously on plant growth. These facts are supplied by the Chief of the Division of Field Crop and Garden Insects of the Dominion Entomological Branch, Mr. R. C. Treherne, in his recently published pamphlet on "Wireworm Control." Methods of control are fully discussed. In the wheat growing districts of the prairie provinces, says the writer, relief from wireworm will be obtained by intensive summerfallowing, commencing in early June. Insectivorous birds at this season of the year also play an important part in destroying the pest.

What are known as False Wireworms have caused material damage in sections of British Columbia and the prairie provinces. The adult is a large clumsy black beetle, which is capable of running actively over the surface of the soil, and may be recognized by the strange habit it possesses of standing still, on their heads, as it were, when disturbed.

Saskatchewan Clay

Extension of Pottery Industry Is Looked For

Investigations are now being made by British interests which are likely to lead to further important development of the well-known clay of Saskatchewan. On behalf of these interests the Saskatchewan Government is supervising extensive drilling at one of the principal deposits, with a view to obtaining comprehensive samples, and if possible, blocking out a quantity of not less than 50 thousand tons. Satisfactory results will probably lead to a considerable extension of the pottery industry in Western Canada.

Spending Large Sums on Highways

The sum of \$2,500,000 will be expended on roads and bridges this year by the British Columbia Government, it was announced by Hon. W. H. Sutherland, Minister of Public Works. Of the total appropriation \$1,396,000 will be spent on highway construction, \$7,000,000 for bridges and about \$200,000 on the construction of settlers' trails in the newer sections of the province.

Reads Home Town Paper

A Marion, Ohio, man returning from a visit to the President, states that the President doesn't have time to read the newspapers, he is so busy. The President confessed to the caller, according to this report, that he takes the Marion Star to his room at night and looks it all over from top to bottom and from the first page to the last. Then he takes a rule and measures up the advertising.

Hog Grading in Practice

The hog raiser who lives sufficiently close to a packing house to market his own pigs direct is making the most rapid advance in the quality of his stock. He is able to watch the grading and to learn precisely the type of hog that is classed as select. The ten per cent. premium the farmer receives for select pigs gives special point to his interest.

There is no quarrel between the grower of food and the grower of crops. The former asks only the soil that is useless to the latter.

Considering what most people are willing to do for money, it is a wonder there are not more millionaires.

Alberta Coal In Toronto

Easterners Find That It Will Really Burn and Produce Heat Too

The committee appointed by the Ontario Government to try out Alberta coal reported that the best grades of Alberta coal would be a satisfactory substitute for United States hard coal. The committee was J. A. Ellis, fuel controller; C. H. Mitchell, of the University of Toronto; and R. P. Fairburn, deputy minister of public works. The committee states that it would be desirable, if there were importation, that only the best grades be brought in.

Importation, in the minds of the committee, would not be satisfactory unless Alberta coal could be delivered in Toronto at \$12.50 a ton, as compared with \$15.50 for United States anthracite. A ton of Alberta coal will not last as long as anthracite and it takes 1 1/2 tons to equal a ton of the hard coal. The tests in private houses showed that there was little smoke and that no good coal was found in the ashes, and with a few exceptions there were no clinkers or slate. It was agreed by all who tested it that the coal gave immense heat and responded quickly to draft. It must be remembered, however, that the coal was used in comparatively mild weather. About the only difficulty reported was that some had trouble in keeping the fire low until the draft was properly regulated.

Annie Laurie's Home

Sold At Auction

Has Been In Hands Of Family For Many Generations

Annie Laurie's home is to be sold at auction. The modest dwelling which is located near Edinburgh has been in the hands of the family of the woman around whom the famous ballad was written for many generations, but financial need compels them to dispose of it.

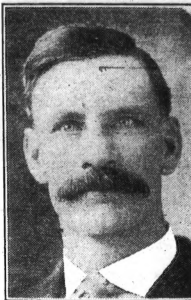

A relic of Annie Laurie's taste is still preserved in the beautiful Georgian garden in the rear of the house. Annie Laurie died in 1761 at the age of 79, and she lies buried in the old graveyard at Craigfairloch.

Professional Jealousy

"What made that prima donna demand your discharge?" "I wrote an article," replied the press agent, "saying that she sings like an angel. She said she saw no reason for complimentary references to anybody's singing except her own."—Boston Transcript.

No woman is as good as many a man thinks she is, and no man is as bad as many a woman thinks he is. Or say it the other way.

Progress Of Cow Testing

Increasing Number of Farmers Taking Advantage of System

Year by year the number of farmers who take advantage of the cow-testing system conducted by the Dominion Dairy and Cold Storage Branch increases. In 1922 there were eight hundred and twenty-six more cows recorded in eight months or over than in the previous year, and the average production of milk and fat was greater, the test being 3.8 in per centage compared with 3.69 in 1921. Quebec stands ahead of all the provinces in number of herds and cows tested, the numbers being 3,469 herds and 33,267 cows.

Ontario comes second with 732 herds and 10,347 cows. Nova Scotia is third with 360 herds and 2,520 cows. In the average test percentage, Nova Scotia ranks first with 4.32 and Quebec second with 3.9. New Brunswick's test in 1922 was 3.86, and Ontario's 3.49. The totals in 1922 for all the provinces, excluding Saskatchewan, which conducts its own testing were 5,125 herds and 50,304 cows compared with 5,194 herds and 47,895 cows in 1921. In Quebec there were 463 testing centres in 1922 and 92 in Ontario. Alberta has the best average for milk and fat, its 111 herds with 1,165 cows averaging 7,222 lbs. of milk and 250.6 lb. of fat, the test being 3.68. Ontario's average milk production per cow under test in 1922 was 7,089 lbs. and fat 247.6.

If there were no such word as fail some unscrupulous man would soon invent one.

It is better, to follow one good example than to sit to a dozen bad ones.

Western Canada Produces Some Of The Best Light Horses Raised On The Continent

Poultry Notes

Feeding Fowl With Grain Properly Treated For Smut

Experiments have been carried out by the Animal Pathologist at Ottawa, Mr. A. B. Wickware, to ascertain if there is any danger of feeding to fowl wheat, oats, or other grains that have been treated with formaldehyde solution for the prevention of smut. The result proves that there is little or no danger in so feeding fowls when the grain has been treated according to the standard method advocated by the Dominion Department of Agriculture. The usual method of treating seed grain is to immerse it in a 1 in 400 solution of formaldehyde for a period of five minutes, after which the grain is allowed to drain for thirty minutes and then spread out in a thin layer to dry. No ill-effects with the dry grain were noted in the experiments either with cockerels three months old or fourteen weeks old, although the latter had the scratch feed soaked for two hours in a double strength of 1 in 200 solution of formaldehyde before it was allowed to drain and spread out to dry. In the third experiment, cockerels four months old, although previously starved for 18 hours, showed little taste for the grain fed to them moist, but when a change was made to dried grain they ate a fair amount at each feeding with no bad effects.

Paris Dreads Traffic Jam

Has Only 30,000 Cars and Room For 250,000

Parisians are much disturbed by the increasing traffic danger from their 30,000 automobiles, which is only one machine to each 100 persons. But they are being given scant comfort by Andre Citroen, France's Henry Ford, who is just back from the United States.

"Paris," says M. Citroen, "easily can accommodate 200,000 cars. The streets are less dangerous than they were during the horse age, and it will be fifty years before Paris is thronged with automobiles as New York and other big American cities are now."

A middle-aged woman once told us that her husband had never spoken a cross word to her. Later we discovered that she had never had a husband.

How a man does hate to exchange good money for a receipted bill!

TO TOUR AGRICULTURAL CANADA

Four English boy farmers photographed aboard the Canadian Pacific steamer "Montezuma" prior to sailing from England.

It is very much to be doubted if four happier boys ever arrived in Canada than Clifford White, Gordon Salter, Joseph Murray and Leonard Grimmer, recent passengers on the Canadian Pacific steamship Montezuma. Singular opportunity has come to these boys, whose lives have been largely circumscribed by their small villages in England, to cross the Atlantic, to see the wonders of Canada and her modes of agriculture, and having seen and learned, to use their knowledge to the advantage of boys other than themselves.

Some time ago the London Daily Mail organized a movement known as the "Young Farmer's Clubs of Great

Britain," along similar lines to those operated in Canada and the United States for the purpose of encouraging boys in specialized farming. Pig clubs, calf clubs, poultry clubs and a host of other clubs were formed in almost every farming community in the British Isles and various competitions brought about much enthusiasm among the young farmers.

The idea was conceived of promoting a spirit of emulation and competition between the agricultural students of the Motherland and Canada, and giving those of England a more comprehensive understanding of farming conditions overseas. E. W. Beatty, President of the Canadian Pacific Railway, who is an active worker among boys was approached, and

through his generosity it was made possible for these four boys, prize winners among all the boys' agricultural clubs of Great Britain, to come to Canada, tour the Dominion and take a full summer course at an Alberta agricultural college.

The benefits which may follow in the wake of their visit are manifold. Upon their return to England the dairies which they are keeping will be edited and published by the Daily Mail and various farm journals, and the minds of other boys in the various clubs will no doubt be turned to the advantages Canada has to offer. An immigration flow of such a class, even eventually, should be from Canada's standpoint, the most valuable and profitable.

The trend of the times all over the continent in recent years has been towards the gradual disappearance of the light horse, and this tendency has been as noticeable in Canada as elsewhere. The general adoption of the automobile, newer modes of travel, the craze for speed, have all contributed to the relegation of this splendid animal to an era that is past, and the popularity of the rider and driver is now largely confined to a limited coterie of lovers and enthusiasts. In Canada the gradual absorption of the ranges and the increase in farming settlement has resulted in a demand for a larger and heavier type of animal. The utilitarian value of the saddle horse and driver has largely been supplanted by mechanical devices, and the light horse is only desired now by a limited number of reactionaries whose love for horseflesh persists in spite of the progressive methods of the times.

There is every indication, however, that Canada is one of the few remaining strongholds of the light horse, a country breeding excellent animals which, from the superiority of their qualities, are in constant demand elsewhere. It may be remembered that at the horse show at the first Royal Winter Fair held in Toronto in December last, a greater number of animals were exhibited than at the famed Madison Square Garden show, indicative of what Canada has to offer and how the Dominion has come to be regarded in this phase of husbandry. Just previous to this Peter Welch, of Calgary, Alberta, breeder, took some of his ponies to horse shows in the Eastern United States, and, ridden by his daughter and sons, they secured a total of eighty-four prizes at Springfield and Brockton, Mass. In the previous year, with ten horses entered at the Spokane Inter-State Fair, Calgary exhibitors brought away thirty-nine prizes and two championships. Both championships were secured by Alberta horses, which took ribbons in practically every event in which they were entered.

In January last a polo pony expert from New York purchased thirty-seven ponies from D. B. Jenkinson, a Cochrane, Alberta, rancher, who paid \$18,000 for them. The ponies were all raised in Alberta from thoroughbred sires, and were fully trained for their purpose. The purchaser, who shipped them through to Virginia, stated that they constituted the finest lot of ponies he had ever seen raised on one farm. They went direct from the open ranges of Southern Alberta to the polo fields of the Eastern States.

This may be, to many people, a new phase of Western Canadian traffic, but it is one which has been in existence for many years. Though the movement is one of relatively small volume it is a constant one, and periodically numbers of them are going from Alberta's ranges to the Eastern States and elsewhere. In the days when the ranches flourished in Southern Alberta, there were six polo teams in that territory made up solely by ranchers, and these utilized exclusively native-bred ponies.

The foundation of the polo pony and light horse of Western Canada has been the native Cayuse, the same animal which constituted the first friend of the rancher and cowboy—the cow pony. The natural qualities which made him invaluable on the ranges, his lightness, stamina, and rapidity in turning, were exactly what was required for polo playing. The introduction of thoroughbred sires imparted greater speed and blood and produced from the wild ponies of the ranges some of the continent's best polo ponies, animals highly prized and valued and in great demand. Similarly some of the finest hunters and riding horses have been produced from these little Western Canadian horses.

Western Canada is one of the areas where the era of the light horse has not yet passed, where he still has a place in the economic life of the territory. The popularity of mechanical transport has not yet put an end to his utilitarian value, and even should this come to pass, which is doubtful, he will always be there to supply the needs of horse-lovers of the continent. There is a constant importation of fine sires to raise the standard of these animals, and a direct stimulus to the breeding of these light animals was given by the Prince of Wales when he introduced into Southern Alberta some of the finest thoroughbred horses of the Dartmoor ponies, which the west had never before known.

Even if you are reasonably sure of going to heaven, you should take out insurance against going elsewhere.

Canada Confident of the Future

CANADA is endeavoring to regain her after-the-war stride in the midst of many difficulties, — debt, deflation and depression being some of them.

Quick remedies and academic theories beset her path on every side. Some suggest that our debt worries can best be eased by going further into debt. Others preach blue ruin, decay their own country and indulge in mischievous propaganda generally, while still others look for a new social order or some miraculous sign to indicate a better coming day—all this in apparent forgetfulness of the fact that just as there was no royal road to win the war, there is now no royal road to pay for it or regain our former buoyancy, vigor and confidence.

Some are leaving Canada hoping to escape taxation, only to find there is no escape anywhere. In seeking for easy remedies too many of us overlook the fact that the greatest remedy is honest, hard work faithfully and intelligently performed, accompanied by old-fashioned thrift.

It takes time, it takes patience, it takes grit. But every Canadian knows in his heart that Canada is coming through all right.

Our Experience Proves It

Look back over the path Canada has trod. The French Colonists, cut off from civilization by 3,000 miles of sea, faced a continent—a wilderness—without the aid of

even a blazed trail. They had to fight savages, frosts, scurvy, loneliness and starvation.

The United Empire Loyalists subdued an unbroken forest in one generation, growing their first wheat amid the stumps and snags of the new clearing.

The Selkirk settlers came to Manitoba when the prairie was a buffalo pasture, and grew wheat where none had grown before and where those who knew the country best at that time said wheat would never grow. Today the Canadian prairies grow the finest wheat in the world.

In proportion to population Canada stands today among the wealthiest nations in the world, with average savings on deposit per family of \$800. Canada's foreign trade per head of population stands amongst the highest of the commercial nations, being \$192 per capita in 1922-23, as compared with \$135 in 1913-14, the "peak" year before the war.

New Opportunities for Canada

In Canada, although prices in the world markets fell below war level, our farmers reaped last autumn the largest grain crop in Canadian history, and Canada became the world's largest exporter of wheat, thus in large measure making up for lower prices.

Last year, Great Britain, after an agitation extending over thirty years, removed the embargo on Canadian cattle, and a profitable and practically unlimited trade is opening up for Canadian stockers and feeders.

"The 20th Century belongs to Canada"—if Canadians keep faith.

The next article will suggest practical opportunities for profit making on our Canadian farms.

Have Faith in Canada

Authorized for publication by the
Dominion Department of Agriculture
W. R. SOUTHERWELL, Minister. Dr. J. H. CRISDALE, Deputy Minister.

More Hebrideans Canada Bound

Typical of a happy type.

THE Hebrideans are a home loving race of people not much given to wandering from their native hearts, but the arrival at St. John aboard the Canadian Pacific steamships Marloch and Metagama of over six hundred sturdy men and women of the western isles, forced by stern necessity to seek their fortunes in the land of promise is not without precedent. In the year 1803 a contingent of 111 was brought from the Isle of Mull by Lord Selkirk to develop the sheep industry on St. Clair Plate, Kent County. If times were hard when these people left home,

Waving farewell to loved ones on the Metagama.

fate was not more kind to them after they had settled here. Forty-five of their number were carried off by fever in the first year and the war of 1812 wiped out the settlement, homes, stock and crops.

In 1812 Lord Selkirk's agent, Colin Robinson, of the Isle of Lewis, persuaded a number of his fellow islanders to whom the abolition of the Clan system had brought high rents and misery, to settle in the Red River district. This party encountered the hostilities of the Indians and, through their industry and progression, the jealousy of the white traders. When the settlement was wiped out on one occasion and many of them wiped out, the remainder were forced to leave. However, they returned in time to harvest the first western wheat crop and many attribute to this fact that Winnipeg stands where it does to-day.

Life will not be a bed of roses for those who have newly arrived and they will have to work, and hard; but this they can do. They are the descendants of the "bards of the isles" who by strength of arms repulsed the invasions of the Scandinavians and Scots. Social and industrial development was retarded to a great extent by the clan system, but those who have adopted Canada are well educated and a simple life of toil in adversity through generations has given them a splendid physique and simple dignity. Although forced by hard times to leave their homes to make new ones, most of them are in sufficient funds and not a few families aboard the Metagama were possessed of over £1,000. Some have stopped in Ontario but the larger proportion of them have gone to Red Deer, Alberta, where they will form a small colony.

INVESTIGATION

shows that rentals consume between 15 and 20 per cent of the average wage earner's income. This is very important as history shows that social disorders increase when people are not properly housed.

THE LOW COST OF BUILDING

ultimately prove the real solution of this situation. Prices for lumber have now reached such a low point that there is no reason why anyone should longer put off building.

CALL AND SEE US FOR PRICES

"Raw From Eczema Doctors Do Their Best"

"Forty years I suffered. One leg raw from toes to body. No living man could believe what I suffered. It was D.D.D. that relieved me, and for three years I haven't had a sign of eczema."

These words are taken from the letter of Rufus Garrett, Chesterville, Ontario. Mr. Garrett will answer any questions you care to ask him. If you haven't tried the cooling, healing D.D.D. for skin disease we shall be glad to send you a bottle today on our personal guarantee. \$1.00 a bottle. Try D.D.D. Soap, too.

Main Street

Mrs. MacReady of Jasper Park is visiting in town the guest of Mrs. Tripp.

Mr. John Ross, of Alexandra, Ont. is visiting his daughter Mrs. Angus McMillan.

Mrs. O. Bathge and children, are visiting with Mrs. Bathge's parents at Hay Lake, Alta.

Mr. Rube Barreth returned last week after spending the winter in Washington.

Mr. N. D. McMillan, called at Irma Wednesday night on his way to Bremner after spending a two months vacation in Ontario.

Mr. W. A. Fowler teacher in the Irma Consolidated High School left Tuesday morning for his home at Whitelaw, Alta.

Mr. D. Costin who has been buying grain at Retlaw, Alma, since last fall returned to Irma for a vacation the first of the week.

Mrs. W. E. Walker returned Monday night from Dunster B. C. where she has been teaching school for the last term.

Mr. C. Z. Costin returned to Irma Thursday morning after teaching the last term north of the Saskatchewan River.

Mr. I. Sawdon left last Saturday with a car of heavy horses which he is shipping to Mount Albert, Ontario. The horses are owned by himself, Mr. W. Prosser and Mr. Waland.

Mrs. F. W. Higginson went to Edmonton Thursday night of last week to undergo an operation which we understand has been successful. Mr. Higginson accompanied her and red to Irma on Wednesday night.

Mr. Ted Barreth, Rube Barreth and Jas Bell started for Edmonton by Motor last Tuesday morning but on account of the heavy rain abandoned the car at Viking and continued the trip by train.

What might have been a bad runaway happened last Monday when J. C. McKay was moving an eight horse outfit from one farm to the other. He had four horse hitched to a wagon with a rack to which he had the other four tied. Something scared some of the horses he was leading when they pulled back pulling the rack off the wagon jumped saving himself but before he could regain the lines the other horses had started on a run, two of them jumping the fence. After running some twenty rods with two horses on each side of the fence they struck a cross fence which stopped them. With the exception of a cut on one of the horses, a damaged rack and badly damaged fence little damage was done.

TERM EXAMINATIONS IRMA PUBLIC SCHOOL SENIOR ROOM

6 Passed Into Grade 8.
Evaline Herbert, Average 75, Lorne Milburn 71, William Blade 57, Edith Hustrup 63, Lucille Smallwood 65, Lloyd Edmonds 65.

AVONGLEN NEWS ITEMS

Avonglen was the scene of "Merry Makers" on June 26th. The concert which was to have taken place on June 22nd but owing to rain weather was postponed to that date.

The house was crowded to its full capacity in spite of the threatening dampness. The gathering represented all the surrounding districts and as far out as Wainwright, Fabyan Irma and Saltux composed a jolly crowd. The programme was late in starting owing to the Orchestra losing the big drum and having to make a return trip 9 miles to recover it.

Nevertheless the children started the stage performance with a patriotic Tableau consisting of singing and reciting after which the remainder of the programme was given. Much credit is due to the children for the splendid acting, singing, reciting and dancing which they did, and the variety of the programme furnished some item to please the most skeptical.

The programme all through spoke of much careful training and the district is to be congratulated on having the services of a teacher with the ability of Miss Mabey. The child's education in these times calls not only for the three R's but for an education that enables a boy or girl to stand on their feet and use their voices. These little rural concerts where the different communities mingle are a very good way to make the rural life what it should be and in all districts there is oceans of talent lying dormant only waiting to be developed by some energetic teacher, and most teachers now would take on a great more of this work could they have the co-operation of the general public and the parents in their respective districts.

The pupils of Avonglen presented Miss Mabey with a Waterman Fountain pen, a box of chocolates, a box of stationery and a glass perfume jar with silver plated flowers as a slight token speaking of the good fellowship which exists between them. Miss Mabey is returning to Avonglen in August.

LEWISVILLE

A very interesting old gentleman is visiting in this part of the country at present. Hale and hearty at the age of eighty two he has travelled alone from Boston, Mass. to visit his children, grand-children and great grand-children. His name is Mr. West, and he is the father of Mr. Dan West, and Mrs. Nat. Moore. He is the grandfather of Mrs. Geo. and Mrs. J. Rubenok and of Fred West, and he is great grandfather of Pearl Rubenok.

Evelyn Rubenok and Edith West, Clean-shaven, stout and hearty the old gentleman certainly does not look his age.

It is on good authority that a Labor organizer from the States has been through the country to the Coast inciting section men to a "strike". This will probably be intended to hold up the movement of the big crop. The farmers have had to suffer a lot and they want to be prepared to cope with any nonsense like this. They need all this crop can yield them.

Joe Rubenok has been away at Rosyth plowing for the last month and is expected home the 30th.

Some excellent work is being done on the roads in the different wards. The Imperial Oil Co. should be made to "dig down" toward roads as their trucks loaded with heavy materials tear the road up faster than the farmers can build them.

VIKING

Viking moved over to Vegreville on Monday, band, bag, and baggage, and ball team. Anybody who had any way of going was there for the big day. Let it be said right here and now that the old burg was not lacking in sports. From 10 o'clock A.M. until 10 P. M. the school sports grounds were the scene of some sport or other. The biggest attraction in the line of sports was baseball, there being five teams competing, Viking, Ryley, Vegreville, Chipman and Lamont. The games were all highly interesting and kept the large crowd in a state of intense excitement and furor. The results were as follows:

Chipman 9, Lamont 8.
Ryley 5, Viking 1.
Vegreville 4, Ryley 1.
Vegreville 7, Chipman 2.

Vegreville kept the big purse at home. Chipman got second money, the rest also ran.

The game that interested local fans of course was the Viking-Ryley game. "Happy" Oslund, the Ryley pitching ace, was in top form against Viking and had our boys busters by the halter most of the time. Forrest, the Viking pitching ace, twirled a remarkably good game, and but for ragged support in pinches, and lack of timely hits when his meant runs, should have been the winning pitcher. There is no denying the fact that Ryley has a great team and with "Happy" going strong, they take some beating. Long had a string of strikeouts to his credit, but the luck and breaks of the game were simply against the team all day, and they bowed gracefully to defeat. Stuporsky, a former Viking player, now with Vegreville, was in

star form in left field. He grabbed some nice ones. Clarence Tymish, another Viking product, was seen in the box for Chipman and put over a win.

The Viking Band made a hit in the old C. N. R. town and the citizens and visitors were delighted with the music. The band gave a street concert just before leaving for home and the Main St. crowded with people who applauded each selection. The band is a good ad. to the town and the many compliments given the organization on Monday were pleasing to all citizens as well.

A hail storm covering about a strip from 3 miles south of town to 12 miles north and about three miles wide struck this district Tuesday afternoon at four o'clock. Coming from the southwest it swept in a northeasterly direction. For about ten minutes the hail stones fell thick and fast accompanied by a deluge of rain. From reports the damage has not been as great as was first anticipated.

In town the storm was at its height, the stones being of considerable size. The grain is mostly in the shot blade and the big wide leaves no doubt saved the stems from permanent damage. Garden stuff stood the gaff well. If the same kind of a storm comes a month later a much greater amount of damage will be done.

MANVILLE HELD BASEBALL TOURNEY

Minburn was successful in winning the baseball tournament held in Manville on July 2nd. In the first round they beat Manville by a score of five to four. The game was keen throughout. Manville leading until near the end, when Minburn tied the score and in the last inning Minburn secured the winning run.

Kitscoty eliminated Vermilion by a score of 6 to 5 and in the finals Kitscoty proved to be easy victims for Minburn, the latter team winning by a score of 17 to 2.

The Minburn basketball girls won their third consecutive basketball tournament this year at Manville on Monday, July 2nd. In the first round Minburn won against the Manville Canaries by a score of 40 to 2.

Vermilion was victorious in its contest with Manville high school, the score being 14 to 4. The final game was well contested.

At the interval the score was a tie of 6-6. In the second period Minburn managed to get 7 points to its opponents 6, making a final score of 13 to 12 in Minburn's favor.

ROYAL YEAST CAKES

MADE IN CANADA

The importance of Vitamins in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

(Continued)

"I could see by the tracks that there was a number of 'em as far as five or six," the old man summed up. "I followed their sign as far as I could, but I lost it at the creek. Then I went back to the house and sent some of the boys out to scout around before I come down here after you."

"Where do you suppose they could have taken him?" Trowbridge asked.

"They'd never dare bring him to town."

"Clawed knees, Lem! There's more pockets and drits up in them hills than there is jack-rabbits. 'Taint likely the boys'll find and send some leadways not in time; not before that—of a Moran—he was him did it, damn him! I know it was Lem, for Gawd's sake, what are we goin' to do?"

"The first thing to do, Bill, is to get you out of this town before the Thomas shows up and jumps you."

"I don't keer for myself. I'll shoot the."

"Luckily, he's away just now. Trowbridge went on, ignoring the interruption. "Come with me," he said the way into the hotel. "Frankie, he said to the red-headed proprietor, 'is Moran in town to-day?'"

"Nup," the Irishman regarded Santry with interest. "He went out this morning with four or five men."

"Rehill's here, ain't he?" Trowbridge asked them. "Tell him there's two gentlemen here to see him. Needs't mention any names. He doesn't know me."

When Santry, with the instinct of his breed, hitched his revolver to a more convenient position on his hip, Trowbridge reached out and took it away from him. "He dared not trust the old man in his present mood. He intended to question the Senator, to probe him, perhaps to threaten him; but the time had not come to shoot him."

"I'll keep this for you, Bill," he said scornfully, and dropped the weapon into his coat pocket. "I'm going to take you up with me, for the sake of the effect of that face of yours, looking the way it does right now. But I'll do the talking, mind! I won't take long. 'We're going to act some, too.'"

Their visit had no visible effect upon Rehill, however, who was too much master of himself to be caught off his guard in a game which had reached the point of constant surprise. His manner was frankly hostile, but he did not appear to be perturbed by it. He had not supposed that the extras he had sanctioned could be carried through without difficulty, and he was prepared to meet any attack that might be offered by the enemy.

"Senator Rehill," Trowbridge introduced himself, "you've never met me. I'm from the Plah Creek country. My name is Trowbridge."

"Now," Trowbridge said to Santry, when they were down stairs, "you get out of town hot-foot. He scribbled to my place, 'Take this!' He scribbled a few lines on the back of an envelope. 'Give it to my foreman; he'll meet me with the boys where the trial divides. We'll find Wade, if we have to trade over beds for larns and kill every horse in the valley.'"

The two men shook hands, and Santry's eyes were fixed with a new hope. The old man was grateful for one thing, at least: the time for action had arrived. He had spent his youth on the plains in the days when every man was a law unto himself, and the years had not lessened his spirit.

"I'll be right after you, Bill," Trowbridge concluded. "I'm going first to break the news to Miss Purnell. She'd hear it anyway and be anxious. She'd better act it straight from me."

"Yes," the Senator nodded. "I've heard of you. I know your friend there by sight. 'em as many as five or six," the old man summed up. "I followed their sign as far as I could, but I lost it at the creek. Then I went back to the house and sent some of the boys out to scout around before I come down here after you."

"Where do you suppose they could have taken him?" Trowbridge asked.

"They'd never dare bring him to town."

"Clawed knees, Lem! There's more pockets and drits up in them hills than there is jack-rabbits. 'Taint likely the boys'll find and send some leadways not in time; not before that—of a Moran—he was him did it, damn him! I know it was Lem, for Gawd's sake, what are we goin' to do?"

When Santry, with the instinct of his breed, hitched his revolver to a more convenient position on his hip, Trowbridge reached out and took it away from him. "He dared not trust the old man in his present mood. He intended to question the Senator, to probe him, perhaps to threaten him; but the time had not come to shoot him."

"I'll keep this for you, Bill," he said scornfully, and dropped the weapon into his coat pocket. "I'm going to take you up with me, for the sake of the effect of that face of yours, looking the way it does right now. But I'll do the talking, mind! I won't take long. 'We're going to act some, too.'"

Their visit had no visible effect upon Rehill, however, who was too much master of himself to be caught off his guard in a game which had reached the point of constant surprise. His manner was frankly hostile, but he did not appear to be perturbed by it. He had not supposed that the extras he had sanctioned could be carried through without difficulty, and he was prepared to meet any attack that might be offered by the enemy.

"Senator Rehill," Trowbridge introduced himself, "you've never met me. I'm from the Plah Creek country. My name is Trowbridge."

Len Trowbridge had seen only one woman faint, but the recollection was indelibly impressed upon his mind. It had happened in his boyhood, at the ranch where he still lived, when a messenger arrived with word of the death of the elder Trowbridge, whose horse had stepped into a prairie-pot hole and fallen with his rider. The picture of his mother's collapse he could not forget, or his own horrible thought that she, too, had passed away, leaving him parentless. For months afterwards he had awaked at night, crying out that she was dead.

The whole scene recurred to him when he told Dorothy of Wade's disappearance, and saw her face flush and then pale, as his mother's had done. The girl did not actually faint, but she was young and wonderfully strong, but she came so near to it that he was obliged to support her with his arm to keep her on her feet. That was cruel, too, for he loved her. But presently, and he recalled that she was from his mind all thought of himself by her piteous appeal to him to go instantly in search of Wade.

"We'll find him, Dorothy; don't worry," he declared, with an appearance of confidence he was far from feeling. "I came around to tell you myself because I wanted you to know that we are right on the job."

"But how can you find him in all these mountains, Lem? You don't even know which side of the range they've hidden him on."

He remained silent, but he had been born in Crawling Water Valley, and that he knew every draw and canyon in the mountains; but in his heart he realized that to search all these places would take half a lifetime. He could only hope that chance, or good fortune, might lead them promptly to the spot they sought.

"Do you think that Senator Rehill knows where Gordon is?" she asked. "Is he in this town?"

"I don't know for sure," he answered. "I believe Moran is acting under Rehill's orders, but I don't know how much Rehill knows of the details. If I knew that, it would be fairly easy."

"Oh, I wish I was," she said. "His strong hands gripped the back of a chair until his knuckles showed white under their tan. 'I'd choke it out of him!'"

"If there was only something I could do," Dorothy wailed helplessly. "A woman never can do anything in a crisis but wait!" Her distress was so pitiable to witness that Trowbridge averted his gaze.

"We'll do all that can be done, Dorothy," he assured her. "Trust me for that. Besides—A thought had just flashed into his head which might relieve her sense of helplessness."

"Oh, I wish I was," she said. "His strong hands gripped the back of a chair until his knuckles showed white under their tan. 'I'd choke it out of him!'"

"If there was only something I could do," Dorothy wailed helplessly. "A woman never can do anything in a crisis but wait!" Her distress was so pitiable to witness that Trowbridge averted his gaze.

Forbidden Region Below Sea Level

Great Cities Found In Ruins In Chinese Turkestan

There is a place in Chinese Turkestan, called Lukchun, that is far below the sea level. This forbidden region is one of the most interesting in the world. Everywhere in it are found ruins of human habitation. Great cities are here, with their mines, farms and industries, dead as though time had stricken them as they stood.

When Atlantis stood high the gulf stream played on one side of it and Arctic currents on the other, but there was little or no intermingling of the waters. In consequence storms as they passed here were deflected down into Europe exactly as Alaskan weather comes to the United States.

But the instant there was a gate by which the Gulf Stream could enter the Arctic Ocean all this was changed. A great suction whirl was set up which lifted the storms from all surface currents into the ocean and switched them into the upper air, to descend, dry and thirsty, on Turkestan.

There is every reason to believe, scientists say, that this is the true explanation, for the sinking of Atlantis and the North Sea correspond in time to the formation of the deserts in Asia and Africa.

"If I learn anything, how can I get word to you?" she asked, her face brightening somewhat. "You'll be up in the hills."

"I'll try to keep a man at the big pine all the time. If you find out anything send word to him."

"Oh, I wish I was," she said. "His strong hands gripped the back of a chair until his knuckles showed white under their tan. 'I'd choke it out of him!'"

"If there was only something I could do," Dorothy wailed helplessly. "A woman never can do anything in a crisis but wait!" Her distress was so pitiable to witness that Trowbridge averted his gaze.

"We'll do all that can be done, Dorothy," he assured her. "Trust me for that. Besides—A thought had just flashed into his head which might relieve her sense of helplessness."

"Oh, I wish I was," she said. "His strong hands gripped the back of a chair until his knuckles showed white under their tan. 'I'd choke it out of him!'"

"We'll do all that can be done, Dorothy," he assured her. "Trust me for that.

PRICE OF A HOME SPENT IN VAIN

Mrs. Logue States Money Failed to Buy Health, But Tanlac Restored It

"I bless the day I started on the Tanlac treatment, for it completely ended my troubles, which had kept me in misery ever since I came here from Scotland eleven years ago," is the grateful statement of Mrs. Emily Logue, 129 N. Park St., Hamilton, Ontario.

"At times indigestion, gas bloating and heart palpitation tortured me till I thought it would drive me frantic. My appetite was so poor I scarcely ate enough to keep going, and I grew so weak and worn out I had to let my housework go. My head ached till I thought it would split, I had fearful dizzy spells, and couldn't get a good night's sleep.

"I spent enough money on medicine to buy a home, but nothing helped me until I started on Tanlac. I now have a splendid appetite, my digestion is perfect, and I always feel strong and well, for Tanlac has built me up to robust health and I will always praise it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 25 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

WORLD HAPPENINGS BRIEFLY TOLD

The National Cotton Spinning Association at Tokio has decided voluntarily to reduce the hours of female workers from 12 to 10 hours daily, effective in July.

Thirty-five thousand of the poorest Glasgow children were given a dinner from the fund of £500 presented for that purpose by the Duke of York in celebration of his wedding day.

Sheriff J. D. Tweed, of Orange County, N.Y., has appointed four women as deputy sheriffs and supplied them with badges. One of the women is his wife.

After 20 years on the staff of University College, Toronto, in the department of Greek, Professor Adam Carstairs is retiring. He graduated from the college in 1880.

Caught in a squall on Lake Huron, near Grimsby, Ont., about 50 miles north of Winnipeg, Walter Greenwood, 12, was drowned when his small boat capsized.

The Azores Islands are threatened with famine due to failure of the Tladeraw Trading Company to deliver \$100,000 worth of corn, according to the Portuguese Consul-General.

No fewer than 42,777 people died from consumption in England and Wales last year. This is an average of 112 a day. The above figures were disclosed by Mr. Neville Chamberlain in the British House of Commons.

George H. Middleton died recently at his home in Vancouver. He came to Canada from England in 1882, and during the second Riel rebellion did special transport work with General Middleton. He was in his 79th year.

Diamond merchants of Antwerp will hold a festival of precious stones in August. Charlois covered with rich Oriental rugs encrusted with diamonds, rubies, emeralds and sapphires will figure in a procession, and 3,000 diamond merchants will follow.

MRS. A. A. FOULGER

This Nurse Sends a Message to Every Woman in Canada

Brantford, Ont.—"During twenty-one years of experience at nursing, I not only took Dr. Pierce's Favorite Prescription myself to keep up my health and strength, but I have also recommended it to many a patient, especially to prospective mothers, and think it is by far the best tonic and nerve tonic a woman can take, and for that reason I give it my highest endorsement."—Mrs. A. A. Foulger, 41 Sheridan Street.

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggists can supply you with Favorite Prescription in tablets or liquid. This Prescription is made in Dr. Pierce's Laboratory in Bridgeburg, Ont. Send to cents. Here if you wish a trial package.

W. N. U. 1475

Curious Laws

Laws in Great Britain Were Very Exact in Days of Long Ago

Funny laws have been tried out sometimes. In Edward III's time a law was passed which forbade more than two courses being served at dinner, except on certain specified holidays. It sounds like the wartime law against treating, and other food regulations. To do, or exercise, any worldly labor, business, or work of any ordinary calling on Sunday is another little misdemeanor for which in the old days people were fined five shillings or put in the stock for two hours. Other things still punishable by law are eating meat on a Wednesday and driving on a Sunday. A stout team of 400 men was summoned for asking a lady without a pedlar's license. Apparently he sold the lavender he used in bags, for had he sold it loose he would not have been looked upon as a pedlar. The summons was dismissed.

First Woman Graduate

Miss Maryatt Receives Degree in Agriculture From Alberta College

The first woman graduate in agriculture from the University of Alberta was given her degree recently. She is Miss Sheila Maryatt, sister of Hon. Mrs. Parby, Minister without Portfolio in the Alberta Government, and lives at Aik, Alberta. For two years Miss Maryatt was a student at Olds Agricultural School, and previously had taken a short course at Guelph. She has just completed a three-year course at Alberta University.

To look your best and to feel the benefits of good health use Dr. Hamilton's Pills frequently. 25c at all dealers.

For Settlers' Wives

Instruction for Wives of Soldier Settlers Arranged by University of Alberta

Short courses of helpful instruction for wives of soldier settlers are being arranged on a comprehensive scale by the Department of Extension at the University of Alberta, in co-operation with various other official organizations. These courses are being planned by the department, along with the Soldier Settlement Board, Home Branch, and in co-operation with the Provincial Department of Public Health and the Provincial and Dominion Departments of Agriculture.

Minard's Liniment for Distemper

Airmen Protect Forests

Fire Control Greatly Assisted By Use Of Planes

Economy in the methods of forest fire control is to be a distinctive feature of the operations of the Canadian Government Air Force during the present season. Instead of patrolling the forests with a large machine, the method to be employed involves patrol by single-seaters. Furnished with wireless telephone apparatus, once a fire is discovered instant communication may be had with the base, from which a large machine carrying men and fire-fighting gear can proceed to the scene.

This, it is pointed out by officials of the Air Force, is along the line of experiments with which the force is blazing the trail for commercial enterprise. The Air Force has done considerable survey and forest fighting work for the different provinces during recent years. The provinces pay the cost of operation plus a small appropriation for depreciation in the machines. This work, it was stated, would be willingly relinquished to commercial enterprises since the Air Force is quite sufficiently occupied in co-operating with the various departments of the Canadian Government.

Test Bullet Proof Autos

Equipped with bullet proof windshields, four-wheel hydraulic brakes, and radio receiving sets, tests have been made on nearly a dozen high-priced motor cars by police department officials of Detroit to decide upon a standard type of machine to be used as police flyers. The tests were all of the most drastic character, likely to be met in extreme police work.

A joy rider is one who is riding while we are walking, and a joy walker is one who is walking while we are riding.—Pittsburgh Sun.

NOSE COLDS QUICKLY STOPPED

A neglected cold is the open gateway to Consumption. To quickly stop a cold, the best way is to clear the air passages of the nose and throat, free them of germs, and let the healing vapors of CATARRHOZONE do the rest. One breath of CATARRHOZONE relieves. Your suffering stops. Hoarseness is relieved, throat and nose are cleared, inflamed bronchial tubes are healed, all danger of Catarrh is prevented. Carry CATARRHOZONE Inhaler in your purse, in your vest pocket, and use it when the first shiver or sneeze comes. Complete outfit, One Dollar, small size 50c. At all druggists. Refuse a substitute. By mail from The Catarrhozone Co., Montreal.

Household Hints

Valuable Recipes For The Busy Housewife

Chocolate Dates

Remove the seeds from fresh, clean dates, stuff them with pieces of marshmallow, others with Swiss-Maid seeded raisins, candied cherries and walnuts. Melt sweet chocolate and into this dip the prepared dates.

Harvey Cranberry Pudding

1 cup cranberries, 1½ cups flour, 2 tablespoons shortening, 1 cup sugar, 2 teaspoons baking powder, ½ cup water, 2 tablespoons water, ½ cup Swiss-Maid seeded raisins, ¼ teaspoon salt.

Sift flour, baking powder and salt, rub in shortening and mix with ½ cup cold water. Roll out on a floured board to ¼ inch thickness.

Wash cranberries and raisins. Boil sugar and 2 tablespoons water two minutes. Let cool. Put in centre of paste, bring up corners, lap over to keep juice from coming out. Put pudding in a well buttered bowl. Tie in a cloth, leaving pieces of room to swell. Place in a pot of boiling water, having enough water to cover. Boil 15 minutes. Serve hot with hard sauce.

BABY'S OWN TABLETS AN EXCELLENT REMEDY

When the baby is ill—when he is constipated, has indigestion, colds, colic or simple fever, or any of the other many minor ills of little ones—the mother will find Baby's Own Tablets an excellent remedy. They regulate the stomach and bowels, thus banishing the cause of most of the ills of childhood. Concerning them Mrs. E. D. Duggan, Thier River, Que., says:—"My baby was a great sufferer from colic and cried continually. I began giving him Baby's Own Tablets and the relief was wonderful. I now always keep a supply of the Tablets in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Like Western Butter

Britain Makes Heavy Importations of Butter From Western Provinces

A dispatch from London, England, states that the present season has witnessed an unusually heavy importation of Canadian butter. The product of the provinces of Manitoba, Saskatchewan and Alberta, exported overseas for the first time, made a favorable impression and usually brought higher prices than that from the eastern provinces. This is attributable to the better system of grading prevailing in the west and to the methods of co-operative marketing.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

"How old are you, Edna?" asked a visitor. "I'm only five," replied Edna with a deep sigh. "I should like to be six, but I suppose somebody has to be five."

CORNS BUNIONS

Minard's takes the "hurt out of them. Also a soothing bath for sore, tired feet.

MINARD'S "KING OF PAIN" LINIMENT

Older Than King Tut

Cypress Tree That Has Attained to a Remarkable Age

Louisiana has an immense cypress tree which contains about 23,000 feet of lumber. It belongs to William Ebenborn who will not have it felled. Scientists say that this tree is 2,500 years old. It was alive when Jerusalem was entered by Nebuchadnezzar; was 600 years old at the birth of Christ; and more than 2,000 years old when Columbus discovered America. Other wonderful trees of immense age are the Baobab tree in Senegal, which is 4,000 years old; the redwood tree in California and a Dragon tree in Teneriffe about the same age; and a cypress in Mexico which is supposed to have reached the remarkable age of 6,000 years.

Even if a man doesn't attempt to flirt with a pretty girl on a street car she suspects that he'd like to.

His Flesh Horribly Burnt

His druggist sold him a cheap Acid corn remedy, instead of giving him good old reliable Putnam's Corn Extractor which has been for fifty years the standard remover of corns and blisters. He was so fast that it was always a success. 25c everywhere. Refuse a substitute.

CIRCLE TOURS OF UNRIVALLED SPLENDOR

ENDLESS SCENIC PANORAMA AWAITING TOURISTS OVER C.P.R. LINES

Picture the quiet beauty of England's Lakeland, the grandeur of the Adirondacks and the towering splendor of Swiss mountains and you will be able to form some idea of the endless scenic panorama which awaits the vacationists taking THE CIRCLE TOURS OF THE CANADIAN PACIFIC.

These delightful tours may be made through Calgary, entering the Rockies at the Gap, through beautiful Banff, lovely Lake Louise and Glacier, leaving the main line for a cruise down the Arrow Lakes, Kootenay Lake and back via The Crow's Nest Line. The second tour takes in the same resorts, but extends further through St. James and down the picturesque Okanagan Lake to Penticton, returning through the Crow's Nest Line. (Both tours apply in the reverse direction if desired.)

The wonderful tours are moderately priced, and offer (as well as a princely feast of scenic beauty) of mountain, lake and woodland) unrivalled comfort of travel. From the moment of starting until the hour of returning the vacationist is assured of a holiday long to be remembered, for the comprehensive nature of the holiday entertainment and the de luxe travelling arrangements which enable the fullest possible enjoyment to be had from start to finish.

Excursion fares for these tours are on sale daily to September 30th, allowing stopovers at any of the delightful resorts. The return limit is October 31st. 15-23

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

Forty Millions in a Spoon

Forty Million Living Organisms in a Gramme of Soil

Soil is usually considered lifeless, but Sir John Russell has taken a census, and finds that in one single gramme of soil, about enough to fill a teaspoon, there are more than forty million organisms. A method of counting them was worked out, and the census was made every day for 365 consecutive days. No fewer than seventeen different organisms were enumerated. One of the most interesting results was the proof that the soil population is not steady in number, as had always been assumed, but is in a violent state of flux. Daily variations were shown independent of external conditions. The whole soil population is depressed in winter and in summer, and is uplifted in spring and autumn.

How this comes about is not known. The apparently lifeless soil must be considered as really throbbing with life, changing daily and hourly in obedience to some great laws which we have not yet discovered.

Electric Smeiter in Winnipeg

What is believed to be the first electric smelter plant in Winnipeg is being installed by the Vulcan Iron Works to manufacture certain products. The plant will commence operations at any early date.

Would Need Sympathy

Suitor.—Willie, will you be sorry when I marry your sister? Willie.—Yes, I'll be sorry for you.

To keep London's great Royal gardens in order, 1,000 gardeners and laborers are employed.

Mustard is valuable in the diet

Did you know that mustard not only gives more zest and flavor to meats, but also stimulates your digestion? Because it aids assimilation it adds nourishment to foods.

but it must be Keen's

Lake Of Epsom Salt

Curious Lake Is Found In British Columbia

The wildest nightmares are no worse than some realities. Imagine a lake of Epsom salt. It exists at Basque in British Columbia. It is at least 41 feet deep and perhaps more. The miners who discovered the lake drilled to that depth and were then obliged to cease for lack of drilling facilities. The lake is said to cover an area of seven acres, and to have a hard crystal surface. When the snow melts from the mountains the surface is covered six inches deep with water, which quickly becomes brine. Then the sun evaporates it, and all that is necessary is to score and lift off the thick crust that has formed. Spring freshets prepare another seven-acre pan. It is, in this respect, like the lake asphalt in Trinidad.

Co-Operative Cattle Market

Many Western Farmers Take Advantage of Pooling Plan to Sell Stock

More than ten million pounds of cattle, live weight, have been sold by the farmers of Western Canada under the pooling plan since co-operative selling was first put into effect at the St. Boniface market on February 15th. Good markets have been found, especially in Ontario, where during March and April large numbers of feeder cattle were shipped.

Soldiers Now Farmers

In a report recently issued by the Soldier Settlement Board of Canada, it is stated that 25,844 soldier settlers have settled about 3,000,000 acres of agricultural land, of which about 200,000 acres were under cultivation last season. About 5,000,000 bushels of grain were produced by the ex-soldiers last season.

Numerals, as used today, are only about 1,000 years old.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonic to the whole system, restoring the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

An Egg Laying Record

In an egg-laying competition at Christchurch, New Zealand, a Black Orpington has broken the world's record by laying 342 eggs in 365 days. The previous record was 329 eggs, laid also by a Black Orpington in Australia.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Only natives may own land in Java, foreigners being permitted to lease it for periods up to 75 years, on condition half the area is available free for growing rice for the natives.

Must Be On Strike

"We have a cuckoo clock in our room." "Ours doesn't work very well, either."

Genuine

ASCHWIN

SAY "BAYER" when you buy. Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-three years and proved safe by millions for headache, colds, toothache,

scarache, neuralgia, lumbago, rheumatism, neuritis, and pain in general. Accept only "Bayer" package which contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottle of 24 and 100.

Greatest Opportunity Ever Offered to Secure Interest in Alberta's Leading Oil Fields

ABSOLUTELY FREE

PROBABLY YOU HAVE NOT REALIZED THE WONDERFUL CHANCES FOR INDEPENDENT FORTUNES TO THOSE WHO SECURE HOLDINGS IN ADVANCE IN NEW OIL FIELDS.

For several years we have watched the movements of Big Interests, in their endeavour to secure supremacy in this our greatest natural resource. These companies have been quietly working over all parts of Alberta, and have secured valuable information, which leads us to believe that Alberta will soon be the Leading Oil Producing country of the Continent.

The Times Leasing Club has secured two choice leases joining the holdings of the largest oil interests in Canada, other leases will be filed on in the near future. You have a chance to join this club and share in all the profits from its leases, absolutely free.

We are forming the TIMES LEASING CLUB and through this we hope to give all our subscribers a chance to obtain an interest in what we believe will soon be Alberta's Greatest Wealth Producing Industry.

You may obtain an interest in the Times Leasing Club, absolutely FREE by subscribing to the Irma Times for One Year at \$2.00 per year in Canada, or \$2.50 to the foreign countries.

For a Limited time the Times will place in trust one dollar of each yearly subscription, for procuring leases for petroleum and natural gas rights from the Dominion Government and for furthering the interests of the Club. The Times will retain an undivided half interest in all leases and will assist in every way to benefit the members of this Club.

The membership in the Times Leasing Club may be worth many, many times the amount of your subscription in the very near future.

Once a member of the Club, always a member.

There are no dues, no assessments, no obligations of any kind. A trust to be handled for the benefit of members.

Can you imagine what a pay-off will mean if oil is found on or near one of our leases.

DON'T MISS THIS OPPORTUNITY

More interest is being manifest. More hopes are being born for the oil fields of Alberta.

What will happen as the drills go deeper? As soon as the oil is found in commercial quantities near our leases this opportunity will be gone for ever.

YOU CAN READ —

Of the trend of development in the columns of the Times that will come to you each week for one year.

YOU CAN WATCH —

For the news that will come of the wells being drilled near your OWN HOLDINGS.

SUCCESS OF THE TIMES LEASING CLUB would mean supreme achievement for Irma Times.

Join Now before it is Too LATE. Use the Attached Coupon.

IRMA TIMES,
IRMA, ALBERTA.

Gentlemen:—

Attached find \$2.00 (\$2.50 for foreign countries) as payment for one year's subscription to the Irma Times, the Alberta Oil Gazette. It is understood that with this subscription I am to receive one free interest in the Times Leasing Club, and that I am to receive in accordance with this interest in all the future benefits of the Club.

Name

Address,

D.D.D. Prescription for Eczema
The Lotion for Skin Disease Soap
—for 15 years the standard skin remedy—a liquid used externally—cures relief from itch, the mildest of cleanliness—keeps the skin in perfect health. Come in and ask us about both.

THOS. J. DERMAN, DRUGGIST

JARROW

The school is closed for the summer vacation, and Miss Johnson has gone to Edmonton for the holidays. The community will be pleased to hear she has been engaged for another year.

The standing of the pupils at the recent examinations was as follows:
Jarrow S.D. No. 2450
Examinations, June, 1923

Grade VII.—Mavis Holloway, aver. 93 per cent, Marion Mathews 63, Margaret Rae 59.

Grade V.—Harry Cooper 62, Grade IV.—Elsie Wahlund 84, Olga Greichel 81, Jean Matthew 74, Ellen Meakins 75, Steve Kawaik 73, William Kawaik 62.

Grade III.—George Pon 84, Gladys Meakins 83, Myrtle Peet 71, Norman Cooper 76.

Grade II.—Lily Meakins 91, Clifford Holloway 87, Edna Peet 78, Henry Greichel 76, Joe Kawaik 74, Jimmy Matthew 72.

Mr. Kennedy has almost completed renovating the parsonage, and our new minister arrived on Tuesday last.

Holidays are in full swing, our genial banker, Mr. Mann returned on Saturday last, and reports having visited Viking, Calgary, and the principal places of importance in Alberta.

George Grant's auction sale on Saturday last was a success in every way. Just a sure gets the price.

Mrs. Stanley Bumpus left for the coast on Saturday last, and expects to be away until August 1st.

Everyone is breaking more land, and everything points to much larger acreage next year.

A large number of the townspeople took in the sports at Sedgewick on the 1st and report having a splendid time.

What's happened to our councillors that the roads are in such poor condition. The grader might be used to good advantage in many places.

What's happened to the Jarrow Ball team?

George Grant and Bernard Hogg left on Tuesday for the Calgary stampede.

Blake Green was a visitor to town on Tuesday last.

Holloway Bros. report a carload of twine in transit, which speaks well for crop conditions in this district.

The new crossing at the elevators is near completion and will be a great improvement on the old one.

The Masonic Lodge held their regular meeting on Thursday night when the brethren from Loughheed visited with them.

Haying has already commenced and the yield so far, is the best for years. Summer fallowing is about completed.

Frank Hansen is still breaking on the Beavencamp place, and expects to be through next week.

George Therou Esq. J.P. has purchased a car, which will greatly assist him in the discharge of his duties, and enable him to devote more attention to public interest.

Mr. Smith, our popular minister is leaving the district and our good wishes go with him. Mr. Smith has filled the position as pastor to the Jarrow Church for 3 years in a very satisfactory manner. Mr. McDonald of Edgerton will take his place and we extend the glad hand of welcome.

Frank Hanson is working 13 horses on a brush breaker and is turning over a large amount of land for Mr. Bovenkamp. While Harry Carter is turning up sod for J. A. Waite.

George Therou, north of Jarrow is breaking up the half section he purchased this spring and a number of Valley farmers are tearing up the scenery.

Mr. Fane, of Edmonton has purchased the half section of C. P. R. land north of Jarrow Station and is busy turning over sod and putting up improvements.

Paul Loring has returned to Jarrow after spending the winter with his parents in Washington. Paul's father Mr. B. C. Loring is well-known in the Jarrow district having homesteaded in the Valley many years ago. He is now in the Retail Boot and Shoe business in Washington. Paul reports that the farmers in the good state of Washington are just as hard up as the farmers around Jarrow only more so.

Ronald Morrison has been on a visit and left for the States.

Mr. Shaw of the Royal Bank staff has been transferred to the Calgary office. It is with regret that we note his departure as Mr. Shaw was very popular in the district. Mr. Toller of Falkirk has arrived to take his position on the staff.

Mr. Cooper has shipped out several cars of cattle and hogs during the past two weeks.

Mrs. Ray Moore of Edmonton has been visiting at the home of her parents Mr. and Mrs. W. Mathews.

Geo. Grant shipped a car of horses to Prince Albert last week.

A large number of friends and neighbors turned out for the funeral of Mrs. Skori at the Norwegian church southwest of Jarrow.

Chautauqua Artists at

IRMA CHAUTAUQUA, July 24, 25, 26, and 27th.

BURBECK CONCERT COMPANY

Musical and Dramatic Program

A soloist, violinist and pianist form a musical group that will delight and satisfy every person who attends Chautauqua. Interpreted with their musical numbers are several dramatic sketches as well, which add infinite variety to their entertainment. Don't fail to see and hear this delightful company of artists.

EILER-WILLOUGHBY ORCHESTRA

Appear on Music Day.

Musical lovers will enjoy the Eiler-Willoughby Orchestra, one of the real big entertainments which will appear on the fourth day of Chautauqua. The Eiler-Willoughby Orchestra has toured the greater part of the North American Continent, and has an enviable reputation wherever it has gone. Miss Eiler, the director and violin soloist, is a possessor of one of the famous old Stradivarius violins.
